

The fast stretch on the River Tone

This part of the River Tone is best known for its fantastic Chub fishing.

TAA Controlled water

- Pegs. (The pegs numbers are not permanent pegs. But just a guide when looking at match reports)

Obridge to the wires pegs 11-19 middle section

From the Obridge downstream the River takes on a different look with a series of Stoney weirs leading into long smooth trotting water. Dropping away at the end of each run into the next weir. The tactics being the same as the top section. You could also use a pole in some of the pegs tight over to the far bank. Tip fishing can be very productive if there is some extra water pushing through. There are also some good Roach Dace & Grayling fishing in the shallow faster runs. Summer 4 winter 4

Firepool to Obridge pegs 1-10 Top end

This section has lovely trotting water with the average depth being around 3ft. Ideal for the stick float or an Avon. 4lb (0.15) main line with a 3lb (0.14) bottom hooks something like a Kamasan B711 or B560 in a size from 14-18. Taunton Angling has the fishing rights of both banks. Right down to Bathpool Bridge. But fishing is predominantly done from the southern bank. Summer 3 Winter 5*

P

Please contact the Club or a local tackle shop for the Gate Code!

The wires to westwood fencing pegs 19-27 Lower section

The bottom end of the fast stretch holds some of the deepest water. Offering the best fishing at the start of the season throughout the summer months. The lower the water levels get the fish tend to hold up under the weirs making it perfect for pole. **Baits for all sections.** The best bait on the fast stretch is Maggots Red, Bronze and white. Bread is also very good towards the end of the season.
